BLI MESTER

Agenda for presentation

Innovative partnerships with Polish university sector

- Introduction to Inspera Assessment
- Key Insights from e-exams project with Kozminski University
- Question & Answers?

*A shared vision of a 100% computer-based assessments
and a digital assessment workflow*

Why transition from paper to computer based exams?

Paper disadvantage

- Paper workflow is highly inefficient and slow
- Paper workflow is insecure in terms of both distribution and biased grading.
- Assessment quality is expensive to evaluate, often requires manual data aggregation.
- Paper and pen limit students to show their true knowledge and skills

Digital advantage

- Digital workflow is very efficient and fast, sometimes automatic.
- Digital workflows minimize risk for exam paper mismanagement and improve grading fairness
- Automatic access to assessment data to evaluate and improve assessment quality.
- Assess a wider range of knowledge & skills with multimodal exams using video, audio and interactive questions.

Inspera assessment

Turnkey solution for university wide deployment of computer based assessments and a digital workflow.

Supporting a wide range of assessment types and the entire assessment workflow

- ❖ School exams
- ❖ Home exams
- ❖ Written assignments
- ❖ Group assignments
- ❖ Oral/practical assessments
- ❖ Bachelor/master thesis
- ❖ Before exam
 - System integrations with SIS (PCG Academia)
 - Planning tool for admins
 - Authoring tool and item bank for teachers
- ❖ Delivery
 - Student delivery solution
 - Secure web browser for BYOD & LAB exams
 - Monitoring tool for invigilators and IT staff
- ❖ After exam
 - Marking & grading tool
 - Tool for psychometric analysis of assessment data
 - Data export and reporting tools
 - System integrations for results management and analysis; and archiving purposes.

Turnkey solution for university wide deployment of computer based assessments and a digital workflow.

Standard system integrations and integrations with 3rd party tools

- ❖ Identity and Access Management System (IAM)
- ❖ Student Information System (SIS) / Student Records System (SRS)
- ❖ Virtual Learning Environments (VLE) / Learning Management System (LMS)
- ❖ Geogebra
- ❖ Inpera Scan integration with Scantron
- ❖ Third-party plagiarism tools
- ❖ VDI-solution
- ❖ Software programming online compiler.

PCG | *Academia*

Supported Devices

Conducting closed-book exams on BYOD requires combined client-server approach

Windows
PC

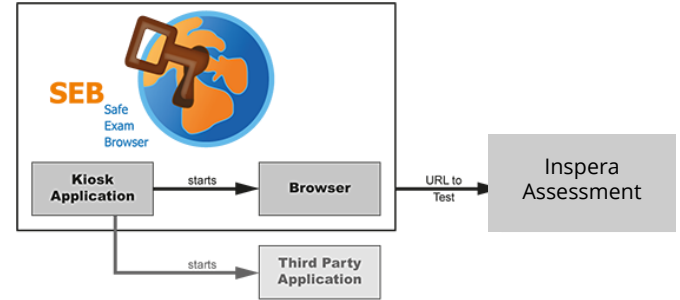

MAC OS X

Chromebook

iPad iOS

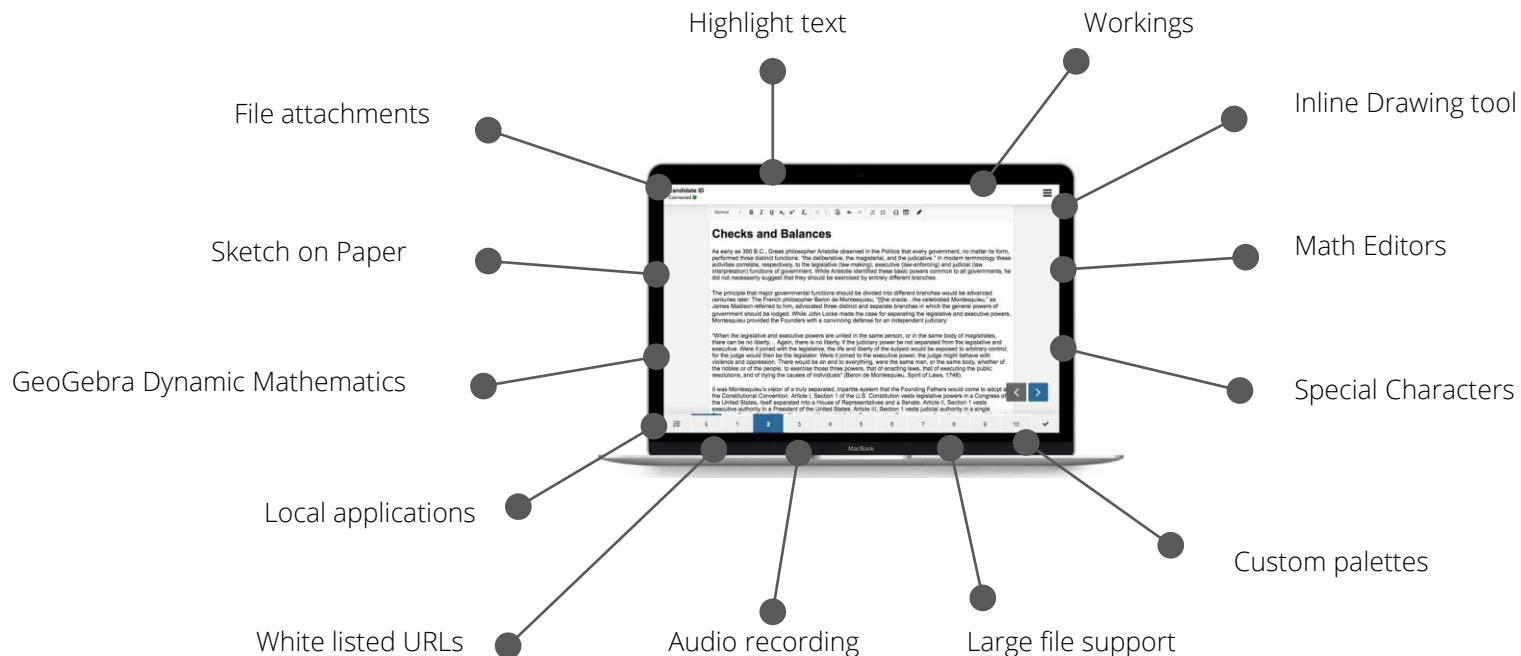

Lock-down environment in labs and for BYOD

- Support Third Party Tools
- White-list URLs
- Client and server side solution
 - Safe Exam Browser for Win/Mac/iPad
 - Kiosk-mode for Chromebooks
 - Process monitoring with machine learning

Authentic Assessment. Today.

Inspera Assessment Player

10 years on a massive scale

Built to scale from day 1

2007 - 20.000 logons in ten minutes, adding servers on short term notice a major challenge in on-prem environment - successfully handled

2017 - Virtually unlimited dynamic horizontal scaling on Amazon AWS secure exam delivery cloud

- ✓ More than 5 mio high stakes exams submitted by 2017
- ✓ Reaching adoption levels of 85% with HEIs by 2017
- ✓ User evaluations show 80-95% user satisfaction
- ✓ 99.99% uptime in 2017
- ✓ 8 planned releases a year with new functionality and average 2 new item types per year
- ✓ No exam paper lost to date

Introduction to Kozminski

AKADEMIA
LEONA KOŹMIŃSKIEGO

Kozminski Examination Centre established 06.2014

- Inspera full deployment on **Sep 2017**
- Every **5th** KU faculty run exams digitally
- **20%** started digital exams this semester
- **25%** got trained in Inspera and prepare their exams individually
- Conducted **4 BYOD** exams

Number of exams

Key Insights from e-exam innovation project

Faculty

- Optimizing time for checking assessments
- No handwriting
- Security for the question sets
- Wide range of the question sets
- Even old professors want e-exams, once they try they never want to go back to paper.

Students

- Students demand fair assessment
- Speed of marking, grading and feedback is important to improve student learning outcomes.
- Decreased cheating with 75-80% on digital exams after 3 years

Key Insights from e-exam innovation project

Administration

Key benefits of Inspera

- Scalable product
- Optimizing human costs
- Opportunities for BYOD
- Independent e-exam delivery

How to make it work?

- Personal support for teachers
- Build credibility for e-assessment internally and grow organically
- Important to choose the right system and provider
- Prepare time for learning
