

### MANAGEMENT

#### dean's office

The effective management of education processes in compliance with the law and based on best practices in higher education management.

#### e-services

A flexible design of document workflows based on student data coming from any Student Information System available on the market.

#### mobile app

An improved communication between the university, instructors and students. Application delivered in a Software as a Service model.

#### analytics

A strategic decision-making and reporting inside and outside of the university based on Power BI technology provided by Microsoft.

### RELATIONS

#### outreach

reaching out to candidates for studies during their final year in high school, when they select exams they want to take during the Matura.

#### enrollment

from electronic registration, through automatic calculation of points, generating ranking lists, and enrolling candidates into the programs.

#### student success

The early identification of students at-risk of dropping out of the selected program of study based on data coming from a variety of data sources.

#### alumni success

supporting students and graduates in connecting with the labor market opportunities and launching a successful professional career.

### INSTRUCTION

#### learn ultra

A complete environment for distant learning that supports communications, progress monitoring and individualized instruction.

#### open lms

An instant impact on the quality of learning experience for Moodle-based instruction - without revolutionary changes for teachers and administrators.

#### ally

The improved accessibility and attractiveness of the educational content shared through e-learning platforms, including Moodle.

#### inspera

organizing, monitoring and assessing digital exams through a secure, web-based application.

**Educloud is a new generation of IT solutions for universities concentrated on the Students and their needs.**
