

Open LMS makes
**an instant impact on the quality of learning experience
for Moodle-based instruction - without revolutionary
changes for teachers and administrators.**

Open LMS provides a modern-looking web
and mobile interface and a complete virtual
environment for distant learning.

BLACKBOARD ALLY

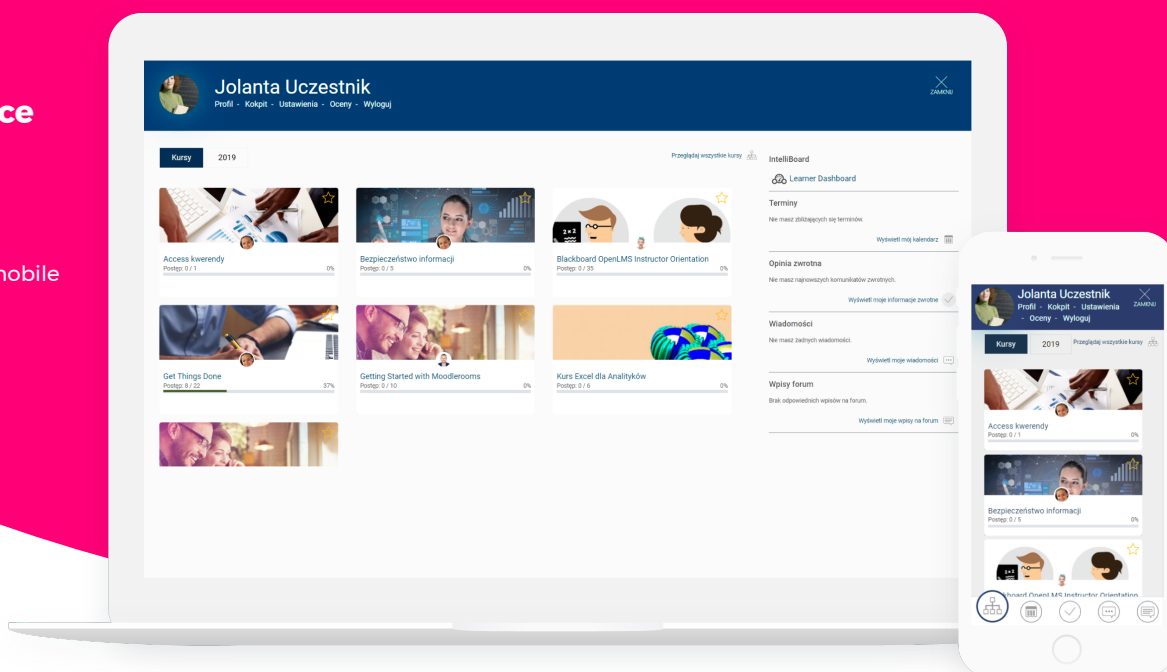

Open LMS
is a part of **educcloud**,
a new generation of IT solutions for universities
concentrated on the Students
and their needs.

User interface

New, modern web and mobile interface

Benefits

Teachers

- › Developing and providing visually attractive content to students
- › Ensuring continuity of educational process for absent students
- › Digital management of testing, grading, and attendance monitoring

Students

- › Access to e-learning content from any computer connected to the Internet
- › Tools for distant collaboration with teachers and peers
- › Learning process that fits the needs and preferences of individual students

Administration

- › No need for double data entry thanks to integration with the university's SIS
- › Standardization and better control of the teaching process
- › Multiple methods of communicating with teachers and students

Functionality

- Developing and sharing static and dynamic educational content
- Ability to build tests, quizzes, and surveys by the teacher
- Advanced discussion forums supporting student feedback and evaluation of teachers
- Automated individualization of educational content based on student progress
- Optimization of student experiences through Snap toolkit
- Full integration with the SIS system, including automated notifications
- Notifications, messages and other communication to all or selected users
- Generating reports on students' engagement with the course
- Access to the platform through web and mobile application (iOS and Android)
- Integration with solutions from Blackboard suite: Collaborate or Ally
