BLACKBOARD ALLY

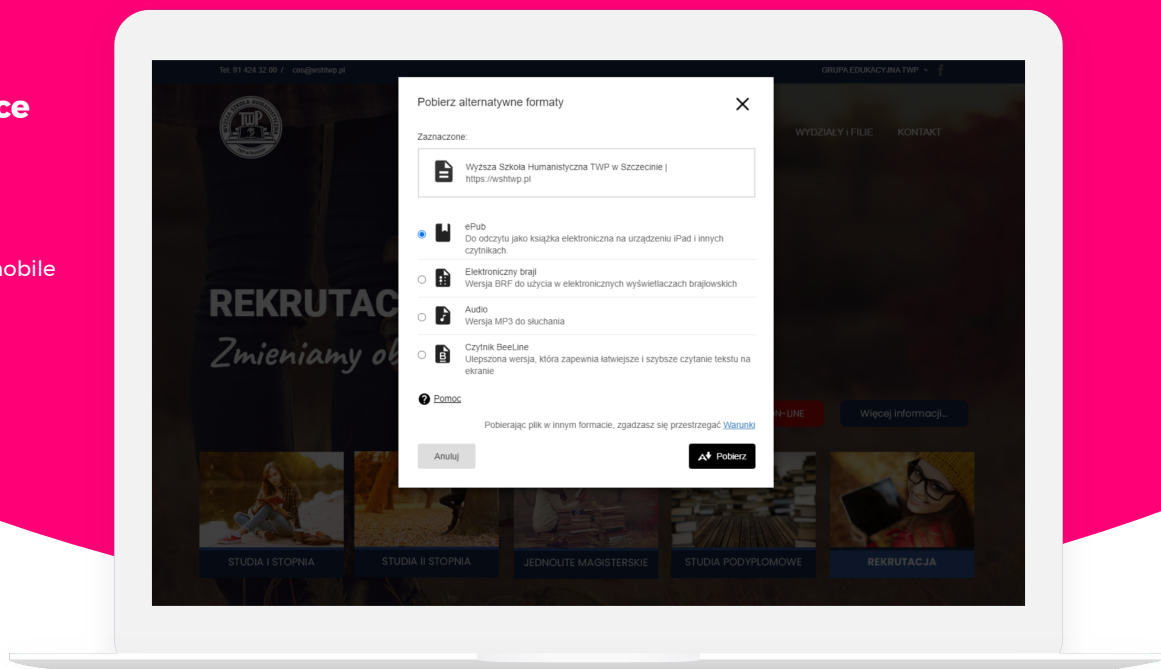

Blackboard Ally for Websites  
is a part of **educcloud**,  
a new generation of IT solutions for universities  
concentrated on the Students  
and their needs.

## User interface

New,  
modern  
web and mobile  
interface

## Benefits

### Website users

- › Important facilitation for people with disabilities and people who have difficulties in perception of digital content
- › Flexibility in choosing the most suitable format for users needs
- › Access without unnecessary waiting - conversion to alternative formats takes from a few seconds to a maximum of a few minutes (for large documents)

### Website administrators and editors

- › Increased awareness of accessibility
- › Effectively eliminate barriers and reach people with special needs
- › Close monitoring of accessibility, easier prioritization of actions and shorter response time thanks to automatic reports

### University

- › Immediate insight into the accessibility level of university's website
- › Support in creating a more inclusive digital environment of university
- › Reaching and engaging new groups of website audience

## Functionality

- Integration with the website content management system (CMS) used by the university
- Checking the accessibility of both the page content and the materials posted as files
- Fast and automated creation of alternative content formats (OCR PDF, HTML, Audio, ePub, electronic Braille)
- Automatically generate a translation of the page content in another language
- Feedback for teachers and content editors on the accessibility of created content
- Context information and advice for further actions
- Automatic identification of problems with accessibility of the website content
- Generating reports on website content accessibility with a list of issues sorted by priority
- Supporting your university in meeting the international WCAG 2.0 accessibility standards
