User interface

New, modern web and mobile interface

Benefits

University

- › Conduct safe and reliable remote exams as a real alternative to stationary exams
- › A consistent e-examination process, whether on or off campus
- › Safe archiving of the exam recordings with easy access for verification

Administration

- › Change any device into a secure workstation, preventing access to unauthorized programs and resources
- › Save time needed for monitoring by viewing only suspicious events
- › Ensure the continuity of the examination process also in the event of loss of internet access

Students

- › Take exams on your own device and at home
- › Standardized and consistent remote examination process for all classes
- › Works even when internet connection is lost

Functionality

- Identity verification with a built-in mechanism checking the student's identity throughout the entire exam
- Video and audio recordings of each test-taker's webcam and screen, which provides extensive evidence and allows to verify any suspicious behavior
- Automatic marking of suspicious events such as the appearance or disappearance of a face other than the student taking the exam in the frame or recorded noise
- A mechanism verifying the proper functioning of system audio (speakers, microphone), video (camera) and desktop recording components
- Browser that blocks student access to unauthorized programs and resources
- Integrity checking with certificates and binary code validation to prevent unauthorized tampering with the software
- Offline mode: continuous work & monitoring despite the temporary loss of internet connectivity
- Breaking the exam into parts to safely conduct longer exams and properly plan breaks
